[1] CAHPS

improvement score of at least 90% receives 4 Quality Improvement

[3] An ACO will be held harmless if their performance on a measure significantly declined, but remained above 90% (or in the case of certain measures, above the 90th percentile benchmark) in both the current year and previous year.

[4] For P4P measures: Points are calculated based on the ACO's performance compared to the 2018 quality measure benchmarks; For P4R measures: Full points are awarded if the ACO completely reports.

[5] The prior year performance rates for several measures have been updated. Specifically: performance rates in the Patient/Caregiver Experience domain have been updated to reflect the revised 2018 CAHPS for ACOs survey, to allow for comparability; the ACO-36 performance rate has been updated to correct a non-material technical error, as announced in the Next Generation ACO newsletter.
