In fiscal year 2020, Revere Health provided 1,170,793 patient visits.

Fiscal year 2020 gross annual revenue was \$309 million representing a 6.47% year-over-year growth rate for the past four years.

In 2020, Revere Health provided approximately \$82 million in uncompensated medical services, 27% of net revenue.

Revere Health has an active patient base of 646,304 citizens.

In 2020, Revere Health treated 54,861 Medicare/Medicaid citizens.

As of March 2021, Revere Health has offered more than 130,000 telehealth appointments and served 70,000 patients through telehealth.

Created in 2011, FollowMyHealth, an online patient portal, gives patients direct access to their personal medical records. The portal also gives patients the ability to interact with their providers, track vitals and lab results, manage their medications and keep track of their health.

Revere Health established an Electronic Health Record in 2002-2003, making every patient's healthcare information available to all physicians within our system. As a result of this implementation Revere Health has received numerous national awards, including Microsoft Clinic of the Year in 2004, for the use of this technology in delivering healthcare and the Excellence in Health Informatics award from the Utah Department of Health in 2010.
